Applicant : Juan PEREZ-SANCHEZ

Group Art Unit : Not Yet Assigned

Appl. No. : 10/823,716

Examiner : Not Yet Assigned

Filed : April 14, 2004

For : ADJUSTMENT MECHANISM FOR A VARIABLE-SHAPED WING

SUBMISSION OF REPLACEMENT DRAWINGS

Commissioner for Patents
U.S. Patent and Trademark Office
220 20th Street S.
Customer Window, Mail Stop _____
Crystal Plaza Two, Lobby, Room 1B03
Arlington, VA 22202

Sir :

Applicant submits herewith replacement drawings for originally submitted Figures 1, 2, 9a, and 9b. Applicant notes that the Figures have been revised to correspond with the reference numerals discussed in the specification.

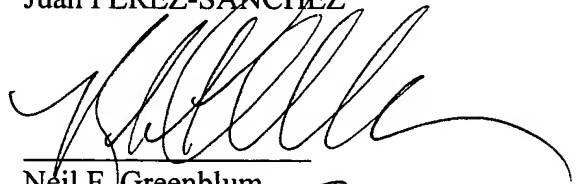

In particular, in Figure 1, the trailing edge of the wing has been identified with reference numeral "2." In Figure 2, the rudder has been identified as reference numeral "7" and the adjustment directions of wing tip 3 have been identified as "XV3", "YV3", and "ZV3." In Figure 9a, rib "R" has been shown, and in Figures 9a and 9b, joints "G1" and "G2" have been identified.

As each of the reference numerals are supported by the original disclosure, Applicant submits that no new matter has been entered, and that entry of these replacement Figures is proper.

Accordingly, Applicant requests entry of Replacement Figures 1, 2, 9a, and 9b.

Should the Examiner have any questions, the Examiner is invited to contact the undersigned at the below-listed telephone number.

Respectfully Submitted,
Juan PEREZ-SANCHEZ
